Our Vision

goodmoodfood imports ecologically and in sustainable permaculture produced food products.

Due to minimal processing of the purely raw materials, a maximum of nutrients and secondary plant substances are preserved - so that you can enjoy the full power of nature!

All our products come from natural mixed cultures.

This permaculture cultivation sustainably preserves the biodiversity of rainforests and thus protects the basis of life for all of us in the long term.

We source our organic raw cacao directly from selected smallholder farmer cooperatives.

It is important to us that everyone in the production- and manufacturing process is paid a fair wage.

Through direct cooperation with our local partners, we have transparency over all steps. It is especially important to us to protect the traditional way of living of the local population and to treat everyone with respect.

We plant trees!

To give back to our nature we support „Eden Reforestation“ with every sold package.

Together we not only plant trees and preserve habitats but also create livelihoods and secure income for local people!

raw cacao - naturally invigorating

Cocoa is not only seen as an ingredient for chocolate, but also arouses our interest as a healthy superfood. Especially raw cacao (Cold processed ($< 45^{\circ}\text{C}$) and not roasted) has many exciting characteristics. Raw cacao is rich in magnesium, zinc, potassium and antioxidants, as well as the stimulant theobromine. The contained amino acid L-tryptophan supports the production of the happiness messengers serotonin and dopamine.

coconut blossom - natural sweetness

Coconut blossom sugar is considered one of the most ecologically sustainable sweeteners on earth. A healthy coconut palm produces coconuts despite nectar harvesting and can live up to 100 years. The palm is also an important contribution to the ecosystem by providing shade for smaller trees and plants.

The precious basis for all our coconut blossom products is the sap of the coconut blossom „Neera“.

Due to the gentle processing our coconut blossom products retain many important nutrients, minerals and their unique taste.
